

# Release notes LinnéFiler 4.3

---

Version: 2015-10-27

Author: Camilla Lyttkens, Fertsoft AB

## **Purpose**

These release notes concerns the changes from the previous version that are implemented in version 4.3 of LinnéFiler and all subsystems that are included in the product, where Fertsoft AB is responsible for development and configuration.

## **System requirements version 4.3 and later**

This release of LinnéFiler requires FileMaker Pro version 13 or later as client and FileMaker Server 13 or later as server application. For more information about hardware and operation system requirements, see [www.filemaker.com](http://www.filemaker.com)

## **System**

### **Test environment/Operating environment**

For safety reasons we have added a feature where we can set a flag that indicates whether a LinnéFiler-version is a trial version or an operating version.

## **Patient**

### **Contact**

#### **PAT\_CONT\_OldRelation**

*PAT\_CONT\_OldRelation.A*

Module where you can register if a relation is old, inactive.

### **Woman**

#### **PAT\_WOM\_PhysExam**

*PAT\_WOM\_PhysExam.Endometrium\_OvaryMeasures*

Earlier, if you pressed the date-button, the module variant would change to another variant. The bug is now fixed.

*PAT\_WOM\_PhysExam.VagUSAntralFolliclesAndCycleInfo*

Earlier, if you pressed the date-button, the module variant would change to another variant. The bug is now fixed.

Earlier, if you registered a value larger than 2x2x2, a question mark appeared in the field for area. That is now corrected.

## Partner

### **PAT\_PARTNER\_GenericNote.A**

Module where you can register a generic comment for the partner.

### **PAT\_PARTNER\_Heridity**

*PAT\_PARTNER\_Heridity.A*

Module where you can register info about heredity.

### **PAT\_PARTNER\_PrevPreg**

*PAT\_PARTNER\_PrevPreg.Curr\_PrevPregChild*

Module to register if the partner previously has given rise to pregnancy or child. If you register that he has – a red dot will be visible on the button for the popover "Prev preg/child".

### **PAT\_PARTNER\_MALEFACTOR**

*PAT\_PARTNER\_MALEFACTOR.B\_AZOO*

Corrected bug – wrong field was connected to the field for azoospermia.

## Summary

### **Stim-popover**

Added a popover which contains a summary of the patients fresh stimulations.

### **Charts for woman and partner**

Now it's possible to register charts on the summary work screen.

## Nurse

### **Week plan**

The week plan on the nurse layout is no longer placed in a popover, instead it's visible on the screen.

## **Treatment**

### Stimulation

#### **Luteal phase and other medical support**

If you register a medication in the module for Luteal phase, a line will be shown under the tabs header.

## **TREATM\_STIM\_InfoLog**

*TREATM\_STIM\_InfoLog.ON*

Log for recording information. Available on all stimulation work screens.

## **Stimulation IUI**

### **Summary and key values of stimulation**

Made a correction so that the fields under the tab "Summary and key values of stimulation" conforms with the tab "Stimulation planning".

## **OPU**

### **PAT\_PARTNER\_BIOPSY**

*PAT\_PARTNER\_BIOPSY.A\_SE\_KS*

If you have chosen biopsy for the partner page, you will also have the possibility to registrate biopsy on the work screen for OPU.

### **TREATM\_OPU\_OPUSpermInfo**

*TREATM\_OPU\_OPUSpermInfo.A*

The module for information about used sperm has been extended with information about sperm access and if the used sperm is fresh or thawed.

## **Embryo**

### **TREATM\_EMB\_FreezeStorage\_prolonged**

*TREATM\_EMB\_FreezeStorage\_prolonged.Reg\_NewDate*

Module to register prolonged freeze storage of embryos.

### **TREATM\_EMB\_OocyteStorageLimit**

*TREATM\_EMB\_OocyteStorageLimit.ON*

Module where you can register the limit for storage of frozen oocytes.

### **Embryo freeze on day 3**

Earlier there was a problem - if you pressed the button to get an automatically generated freeze number the tab jumped to the line of the first embryo. That is now corrected.

### **Embryo cultivation**

Changes and new columns in embryo cultivation:

*DO*

### **DOMorf**

Morphology. Value list.

*D1*

***D1Morf***

Morphology. Uses the same value list as Morphology for day 0-3.

***D1SER***

***D1VAC***

***D1Shape***

*D2*

***D2VAC***

***D2SY\_X***

Same field as D2SY but now as a checkbox.

*D3*

***D3VAC***

***D3SY\_X***

*D4*

***D4ICM***

***D4TRD***

**Embryo freeze**

The module for recording data about embryo freeze has been redesigned. Some changes are made and some new fields are added:

*Fr\_LabelPrinted*

*Fr\_Time*

*Fr\_Field* (in which you only can register numerical values) and *Fr\_Filed\_T* (in which you can register alfa numerical values).

*Fr\_Sect*

*Fr\_Visot\_Colour*

*Fr\_Goblet\_Colour*

*Fr\_CryoCane\_Colour*

*Fr\_Comment*

*Fr\_Sign*

*Fr\_Science*

## **Result**

### **TREATM\_RESULT\_Complications**

*TREATM\_RESULT\_Complications.SE\_QIVF*

Module for recording complications related to the treatment.

### **Q-REG**

New work screen where data to the Swedish quality register – Q-IVF is collected.

## **IUI**

### **TREATM\_OPU\_OPUSpermInfo**

*TREATM\_OPU\_OPUSpermInfo.A*

The module for information about used sperm has been extended with information about sperm access and if the used sperm is fresh or thawed.
